PROFESSIONAL SUMMARY

IT Support Engineer with 5+ years across enterprise service desk, identity & access management, and endpoint operations for large global user bases. Hands-on with Active Directory, Microsoft 365, and basic Azure administration, with growing exposure to cloud identity, mailbox diagnostics, and virtual desktop/Citrix environments. Complements support work with a self-directed track record in applied AI automation including a deployed multi-agent Python system integrating the Claude API reflecting the ability to learn and ship beyond the scope of the day job.

EXPERIENCE

Systems Engineer | Tata Consultancy Services - BGC, Taguig

July 2024 – September 2025

- Supported a newly launched (pioneer) enterprise account spanning both voice and chat channels, averaging 20–30 incidents per day across desktop, application, and OS support while consistently meeting SLA targets.
- Managed Active Directory account operations, password resets, unlock/disable checks, and group membership verification with full adherence to security and escalation policy.
- Performed first line Azure and Microsoft 365 administration: checked user account and virtual machine status, restarted VMs, verified license/group membership, and reviewed mailbox configuration issues.
- Troubleshoot Microsoft 365 mail flow and client issues, including Outlook Safe Mode isolation, OWA vs desktop app comparison, and message trace review to diagnose delivery failures.
- Resolved Citrix virtual app/desktop session issues and diagnosed connectivity problems using ping, ipconfig, and DNS flush/release/renew, reducing repeat tickets for common network faults.
- Diagnosed and resolved incidents remotely via RDP and BeyondTrust/Bomgar, including remote software installs, and maintained ticket documentation in ServiceNow that fed the internal knowledge base.
- Performed routine VDI health checks, application installs, restarts, and login verification on VMware/Omnissa environments.

IT Support Engineer | Atos - Pasay City

February 2023 – July 2024

- Managed a daily queue of 15-25 remote support incidents via ServiceNow across end-user devices, network connectivity, virtual machines, and applications.
- Supported VPN and MFA setup and troubleshooting, following established procedures and escalating out-of-scope cases appropriately.
- Executed MDM tasks in AirWatch device health checks, iOS information lookups, and BitLocker status verification across a mobile endpoint fleet.
- Supported POS system troubleshooting using runbooks, coordinating escalations to maintain service continuity for retail operations.

AI Automation Project | Independent - Manila

January 2026 - Present

- Designed and deployed a multi agent Python automation system integrating the Claude API and YouTube Data API, fully automating content publishing across two channels, self-directed applied AI work alongside full-time support responsibilities.

Personal IT Projects | Independent - Manila

2021 - 2023

- Assembled and configured custom desktop PCs, including component selection, hardware installation, and Windows OS setup.
- Performed OS reinstallations and software configuration on laptops, reinforcing core hardware and systems fundamentals.

Technical Support Representative | Conduent - Pasay City

September 2019 - September 2021

- Managed 25-35 concurrent chat sessions per day for technical and billing support across multiple devices and software platforms, consistently meeting volume and quality targets.
- Applied structured troubleshooting to resolve complex Tier 1 cases and handled escalations for issues outside defined scope.
- Mentored 5+ new hires on troubleshooting procedures and quality standards, contributing to team performance initiatives.

Technical Support Representative | Convergys - Alabang

2015

- Provided phone and remote technical support for workstation/desktop computers, resolving software issues and performing Windows OS upgrades and clean installs.
- Tracked tickets and managed user communication using Moxie, taking ownership of email cases through to resolution or escalation.
- Assisted users with hands on hardware troubleshooting, including blind hardware removal and part replacement/installation.
- Coordinated depot repair or onsite technician dispatch for hardware replacement when issues could not be resolved remotely.

Technical Support Representative | Sitel - Ortigas

2014

- Provided Tier 1 phone based technical support for Toshiba laptops and hard drives, covering both software and hardware troubleshooting.
- Sold extended warranty/service plans as part of the troubleshooting workflow, contributing to team sales metrics.
- Coordinated depot repair or onsite technician dispatch for hardware replacement when remote resolution was not possible.

TECHNICAL SKILLS

Identity & Access: Active Directory (reset, unlock, disable checks, group membership), Microsoft 365 (account/license/membership checks, mailbox & message trace troubleshooting, Outlook Safe Mode, OWA), Azure Entra ID (basic), Okta Verify

Cloud & Virtualization: Azure (user/VM status checks, VM restarts), basic VDI health checks (VMware/Omnissa), Citrix session reset & troubleshooting

Remote Support & ITSM: Windows RDP, BeyondTrust (Bomgar), TeamViewer, LogMeIn123, Zoom Remote Control, ServiceNow, Moxie, remote software deployment

Networking: TCP/IP, ping, ipconfig, DNS flush/release/renew, WiFi troubleshooting, VPN/MFA support

Endpoint & Hardware: Windows OS troubleshooting, PC assembly, OS reinstallation, MDM basics (AirWatch), CrowdStrike Falcon (basic: status checks, reinstalls on macOS)

AI & Automation: Python (AI-assisted development), Claude API, YouTube Data API, multi-agent workflow design

EDUCATION

Bachelor of Science in Information Technology - Divine Word College of Vigan, 2013
